

### LEGEND

	Populated Places		FEMA Flood Hazard Areas
	Bus Stations		Fire Perimeters
	Daycare Facilities		Potential Debris Flow Risk Areas
	EMS		USGS Potential Debris Volume
	Hospital		0-1,000 cubic meters
	School		1,001 to 10,000 cubic meters
	Fire Station		10,001 to 100,000 cubic meters
	Police		Red Cross
	Dam		Colleges Universities
	Red Cross		
	Colleges Universities

MAPS FOR ADVISORY PURPOSES ONLY. NOT FOR INSURANCE RATING PURPOSES. This Mud/Debris Flow Hazard Awareness Map was prepared to assist cities and counties in identifying their mud/debris flow hazard. It is intended for local jurisdictional evacuation planning uses only. This map and the information presented herein, is not a legal document and does not meet disclosure requirements for real estate transactions nor for any other regulatory purpose. Debris flow volumes calculated in response to a 10 year recurrence based on 3 hour duration storm producing 2.5 inches of rainfall. Volumes based on a model currently being tested. Debris flow behavior is highly unpredictable and this map shows the best available information at the time of printing. Populations estimated using 2007 Census data and are calculated for those areas only within the grid index.
